

PRD — Agent Commission Module

MyLorry.AI · Commission Engine

Product	MyLorry.AI
Module	Agent Commission
Author	Cynthia Tjandra, TUG Delivery Manager
Last Updated	8 Jun, 2026
Version	1.3 - Updated 8 Jun, 2026 (based on Product Session feedback) Scope update (v1.3): The Commission page in Host Portal is restructured as a 3-tab page under the Agent sidebar item, replacing the standalone Commission History nav item (hidden). Tab 3 (Subscription Commission) is a UI placeholder only this sprint — no logic built until business rules are confirmed with Vincent. 1.2 — Updated May 15, 2026
Status	In Review — Updated from June 04 Product Session - <i>New items highlighted with Yellow</i>

1. Overview

Agent Commission is the mechanism by which MyLorry calculates, tracks, and processes earnings for registered Agents based on the fuel consumption activity of the SP Accounts under their management.

Agents are internal sales partners (currently ~7–10) who onboard logistics companies onto the MyLorry platform. Their commission is calculated monthly, using a **two-layer model**: a volume-tiered base rate (per org) multiplied by a KPI achievement percentage (across all orgs). Commission is **fuel-only** — it does not apply to MyAdmin/MyTrip subscription revenue.

Scope

Area	Included
Host Portal — Commission configuration & monitoring	✓ In Scope
Agent Portal — Commission viewing & payout requests	✓ In Scope
Referrer commission	Dropped for now

2. Objectives

#	Objective
O1	Enable Host to configure agent commission tiers and KPI targets per agent
O2	Give agents real-time visibility into their commission earnings, KPI progress, and SP Account breakdown
O4	Surface rebate rate and agent assignment data to Org Admins for transparency
O5	Replace manual commission tracking currently done outside the platform
O6	Resolve existing commission grouping bugs (Bug #6) through correct data architecture
O7	Build the commission engine correctly first — it will be replicated for Referrer and Reseller roles
O8	Design the commission page architecture to accommodate subscription commission as a parallel track, without coupling the MyFuel commission engine to subscription rules

3. Portal Mapping

Portal	Role	Access Level
Host Portal (Web)	MyLorry Staff — Finance / Ops	Full config + monitoring + payout approval
Agent Portal (Web)	Internal Agent(s)	Own commission + KPI view + payout requests only

 *Auth note: The Agent Portal sits outside the standard Host/Org taxonomy. Authentication must be scoped to agent identity only — agents must NOT have visibility into other agents' data or Host-level configurations.*

4. Commission Calculation Model

4A. Two-Layer Model

Agent commission uses two independent layers that are calculated separately and then combined.

Layer 1 — Base Rate (per org, determined by org monthly volume)

- Each month, every SP Account's fuel volume is calculated individually

- That volume is mapped to the agent's commission tier table → determines the base rate (RM/liter) for that org
- Each org can fall into a different tier in the same month
- Base rate is agent-specific — different agents can have different tier tables
- Default base rate: RM 0.005/L (confirmed)
- Minimum: at least one tier must be configured per agent

Layer 2 — KPI Multiplier (per agent, based on total volume across all orgs)

- KPI target = total fuel volume (liters) the agent must achieve within the KPI evaluation period
- KPI achievement determines the multiplier % applied to commission
- KPI is calculated on agent's TOTAL volume across ALL assigned SP Accounts — not per org
- Default KPI evaluation period: December 1–31 (confirmed)
- Host can configure a custom start/end month per agent
- KPI progress counts from KPI period start date, not the agent's join date

Commission Formula

$$\text{Commission} = \sum \text{per org [(Org Monthly Liters} \times \text{Volume Tier Rate)]} \times \text{KPI Multiplier \%}$$

Worked Example

Factor	Value
Org A volume	2,000 L → Tier 1 → rate = RM 0.010/L
Org B volume	3,000 L → Tier 2 → rate = RM 0.020/L
Agent total volume	5,000 L; KPI target = 10,000 L → Achievement = 50% → Tier 2 → 50% multiplier
Commission	$[(2,000 \times 0.010) + (3,000 \times 0.020)] \times 50\% = [20 + 60] \times 50\% = \text{RM } 40$

Monthly Commission Formula in Action

$$\text{Monthly Commission (RM)} = \text{Monthly Usage (L)} \times \text{Volume Tier Rate (RM/L)} \times \text{KPI Multiplier \%}$$

Org	First Usage	Eff. Date	Month	Usage (L)	KPI	Tier	Commission	Why
Org A	15 Aug 2024	1 Jan 2026	Jan 2026	200,000	120%	100%	RM 1,000	Pre-2026 → reset; KPI hit
Org B	31 Dec 2025	1 Jan 2026	Jan 2026	200,000	85%	50%	RM 500	Pre-2026; partial KPI
Org C	20 Nov 2025	1 Jan 2026	Jan 2026	200,000	60%	0%	RM 0	Pre-2026; KPI failed
Org D	1 Jan 2026	1 Jan 2026	Jan 2026	300,000	60%	100%	RM 1,500	New Org exception → 100%

Org E	15 Jan 2026	15 Jan 2026	Jan 2026	250,000	60%	100%	RM 1,250	New Org protected; 1st year
Org F	1 Jul 2026	1 Jul 2026	Jul 2026	800,000	90%	50%	RM 2,000	Mid-year onboard; 50% tier
Org G	31 Dec 2026	31 Dec 2026	Dec 2026	2,000,000	130%	100%	RM 10,000	Shortest duration; KPI hit
Org G	31 Dec 2026	31 Dec 2026	Jan 2029	200,000	—	Expired	RM 0	Commission expired post Dec 2028
Org I	1 Jan 2026	1 Jan 2026	Jan 2029	500,000	120%	100%	RM 2,500	5-yr validity; still active Jan 2029
Org J	1 Feb 2027	1 Feb 2027	Feb 2027	400,000	60%	50%	RM 1,000	New Org exception set to 50% by Host

Usage (L)	Vol Tier Rate	KPI Multiplier	Formula	Commission
800	RM 0.010/L	100%	$800 \times 0.010 \times 100\%$	RM 8.00
1,500	RM 0.020/L	100%	$1,500 \times 0.020 \times 100\%$	RM 30.00
2,500	RM 0.020/L	50%	$2,500 \times 0.020 \times 50\%$	RM 25.00
2,500	RM 0.020/L	0%	$2,500 \times 0.020 \times 0\%$	RM 0.00
3,000	RM 0.030/L	100%	$3,000 \times 0.030 \times 100\%$	RM 90.00

Volume tier rate and KPI multiplier thresholds are both configurable by Host. Volume tiers are set via Agent Commission Configuration, not the SP Account Rebate Setting (see Section 11).

4B. KPI Tier Structure

KPI is evaluated annually using the **December 1–31** window (default). The result is applied to the following year's commission multiplier.

Tier	KPI Achievement	Commission Multiplier
Tier 1	$\geq 100\%$	100% — full commission
Tier 2	$75\% \leq \text{KPI} < 100\%$	50% — half commission
Tier 3	$\text{KPI} < 75\%$	0% — no commission

Boundary rules: KPI exactly 75% → Tier 2 (50%). KPI exactly 100% → Tier 1 (100%). All tier thresholds and multipliers are configurable by Host.

KPI Worked Examples

Scenario	Target (L)	Actual (L)	Achievement	Comm %
KPI Exceeded	1,000,000	1,200,000	120%	100%
KPI Exactly 100%	1,000,000	1,000,000	100%	100%
KPI Partial (85%)	1,000,000	850,000	85%	50%
KPI Exactly 75%	1,000,000	750,000	75%	50%
KPI Failed (60%)	1,000,000	600,000	60%	0%

4C. Commission Validity Engine

The Commission has a configurable validity window per org. Once the window expires, the org earns no further commission for the assigned agent.

End Date Formula: 31 Dec of (Effective First Usage Year + N - 1)

- Pre-2026 orgs: Any org with first usage before 1 Jan 2026 → effective date is reset to 1 Jan 2026 automatically
- Post-2026 orgs: First usage on or after 1 Jan 2026 → effective date = actual first usage date
- Default validity: 3 years. The host can configure N years per org. Minimum possible window: 2 years + 1 day.

First Usage	Effective Date	End Date	Duration	Note
15 Aug 2024	1 Jan 2026	31 Dec 2028	~3 years	Pre-2026 reset
31 Dec 2025	1 Jan 2026	31 Dec 2028	~3 years	Last pre-2026 org
1 Jan 2026	1 Jan 2026	31 Dec 2028	Exactly 3 years	Start of new policy
15 Jun 2026	15 Jun 2026	31 Dec 2028	~2.5 years	Mid-year onboarding
31 Dec 2026	31 Dec 2026	31 Dec 2028	2 years + 1 day	Shortest duration
1 Jan 2026	1 Jan 2026	31 Dec 2030	5 years	Host sets N = 5

4D. New Org Exception Rule

An org whose first usage date falls within the current commission year is classified as a **New Org** and bypasses standard KPI tier rules for that first eligible year.

Default: Auto 100% (confirmed)

Mode	Behaviour
Auto 100% (Default)	New org automatically receives 100% commission multiplier regardless of KPI achievement. Protects agents during ramp-up.
Custom % (Host-Set)	Host sets a specific multiplier per org at time of assignment (e.g. 50%).
No Exception (Disabled)	New org follows standard KPI tier rules from their very first month.

New Org Exception applies to the first eligible commission year only. From Year 2, standard KPI tier rules apply automatically.

Org	First Usage	KPI Actual	Exception Applied	Comm %	Reason
Org D	1 Jan 2026	60%	Auto 100%	100%	New Org — first eligible year
Org E	15 Jan 2026	60%	Auto 100%	100%	New Org in same year — protected
Org J	1 Feb 2027	60%	Custom 50%	50%	Host set exception to 50%
Org B	31 Dec 2025	85%	None (pre-2026)	50%	Existing org — normal KPI tier applies

4E. Rule Execution Order

The system checks these 5 steps in sequence for every org, every month:

Step 1 Check Commission Validity

Is the org still within its configured validity window? → If expired: Commission = RM 0. Stop.

Step 2 Check New Org Exception

Is this org a New Org (first usage within current commission year)? → If yes: apply configured exception rate. Skip KPI check. Go to Step 5.

Step 3 Calculate KPI Achievement

KPI % = Actual Usage ÷ KPI Target × 100. Based on Dec 1–31 evaluation window (default).

Step 4 Determine Commission Multiplier

Map KPI % to tier: ≥100% → 100%; 75–99% → 50%; <75% → 0%.

Step 5 Calculate Monthly Commission

Monthly Usage (L) × Volume Tier Rate (RM/L) × Commission Multiplier %. Result credited to agent for that month.

4F. Host-Configurable Settings (Confirmed Defaults)

Setting	Default	Configurable?
KPI Evaluation Period	December 1–31	Yes — Host sets start/end month per agent

KPI Target Volume	1,000 L	Yes — any value in litres, set per agent
Commission Validity	3 years	Yes — Host sets N years per org
Base Rate	RM 0.005/L	Yes — applies to all orgs unless overridden
KPI Tier 1 threshold	≥ 100% → 100%	Yes
KPI Tier 2 threshold	75–99% → 50%	Yes
KPI Tier 3 threshold	< 75% → 0%	Yes
New Org Exception	Auto 100%	Yes — Auto 100% / Custom % / Disabled

4G. Org Grouping — Important Clarification

Org grouping (Master/Member) affects org rebate **ONLY** — it does **NOT** affect agent commission. Agent commission is always calculated individually per org, regardless of grouping.

Org Grouping (affects rebate)	Agent Commission (not affected)
TUG (master, 200k L) + ABC (member, 100k L) = 300k L pooled → determines org rebate tier	TUG's 200k L and ABC's 100k L are calculated separately against the agent's tier table

5. User Stories

– = Undecided, no need to build yet.

5A. Host Portal (Tenant 1 — Finance / Ops)

ID	User Story
US-HC-01	As a Host, I want to configure commission tier tables per agent so that base rates are calculated correctly per org volume
US-HC-02	As a Host, I want to set and edit KPI targets per agent (volume target + evaluation period) so that the KPI multiplier is applied correctly
US-HC-03	As a Host, I want to view all agents' commission summaries so that I can monitor total payout obligations
US-HC-04	As a Host, I want to filter commission reports by agent, date range, and SP Account so that I can audit specific earnings
US-HC-06	As a Host, I want to export commission reports as Excel so that Finance can reconcile
US-HC-07	As a Host, I want to view commission history per agent (monthly, last 12 months) so that I maintain a full audit trail

US-HC-08	As a Host, I want to configure the commission validity period per org so that end dates are calculated correctly and agents are aware of their commission windows
US-HC-09	As a Host, I want to set the New Org Exception mode per org at time of assignment so that first-year commission is handled correctly
US-HC-10	As a Host, I want to set an agent's termination date so that commission is pro-rated accurately and stops at the correct cutoff
US-HC-11	As a Host, I want to transfer an org from one agent to another so that commission continuity is maintained without resetting the org's validity timeline

5B. Agent Portal

ID	User Story
US-AG-01	As an Agent, I want to see my total commission earned this month so that I know my current earnings
US-AG-02	As an Agent, I want to see my KPI progress — current volume vs target and evaluation period — so that I know how much more I need to achieve
US-AG-03	As an Agent, I want to see a commission breakdown by SP Account so that I understand which accounts contribute most
US-AG-04	As an Agent, I want to view a monthly commission history (up to 12 months) so that I can track earnings trends
US-AG-05	As an Agent, I want to submit a payout request so that I can receive my earned commission
US-AG-06	As an Agent, I want to track the status of my payout requests so that I know when to expect payment
US-AG-07	As an Agent, I want to export my commission summary as PDF or Excel for my own records

6. Functional Requirements

6A. Host Portal — Commission Configuration (inside Agent Module)

The commission engine configuration must be a dedicated full page in the Host Portal — not a popup or inline form.

Ref	Requirement
FR-HC-01	Host can view all agents in a list with their current commission configuration summary
FR-HC-02	Clicking an agent opens a dedicated commission config page for that agent

FR-HC-03	Commission tier table: Host can add/edit/delete volume tiers. Each tier has: Volume range (from-to liters), Base rate (RM/liter). Minimum 1 tier required.
FR-HC-04	Final tier: The last tier must be marked as "Final Tier" — system applies this rate for any volume above the last defined threshold (no upper cap)
FR-HC-05	Validation: Cannot save if no final tier is set. Error message: "Please set a final tier before saving."
FR-HC-06	KPI config per agent: • Volume target (liters), • Evaluation period (default Dec 1–31; Host can configure custom start/end month), • KPI thresholds: $\geq 100\% \rightarrow 100\%$, $75\text{--}99\% \rightarrow 50\%$, $<75\% \rightarrow 0\%$. Boundaries: exactly 75% $\rightarrow$ 50%; exactly 100% $\rightarrow$ 100%. All thresholds configurable.
FR-HC-07	KPI evaluation period defaults to December 1–31. Host can override with a custom start/end month per agent.
FR-HC-08	Commission rates and KPI settings are versioned — historical configurations are preserved; changes take effect from configured start date
FR-HC-09	Host can assign/reassign SP Accounts to an agent from this page
FR-HC-10	Commission is calculated on confirmed (settled) Petron transactions only — pending and reversed transactions are excluded
FR-HC-11	Agent list must include a Commission Status column. States: Pending Onboarding (assigned, no transaction yet), Activated (commission window live), On Hold (paused during transfer), Deactivated (expired or terminated). Visible both in the agent list and in the Agent detail view per SP Account row.

6B. Host Portal — Commission Monitoring Dashboard

Ref	Requirement
FR-HM-01	Dashboard header KPIs: Total commission payable (current period), Total active agents, Total pending payout requests
FR-HM-02	Agent commission table: Agent name, No. of SP Accounts, Total liters (period), KPI achievement %, Commission amount, Payout status
FR-HM-03	Filters: Date range (month/period picker), Agent name/ID, SP Account, Payout status (Pending / Approved / Paid / Rejected)
FR-HM-04	Clicking an agent row drills into: per-SP Account breakdown (volume, tier applied, base rate, commission amount)
FR-HM-05	Export to Excel: Full commission report with all agent rows, SP breakdown, and KPI data

FR-HM-06	Payout queue: Host can Approve or Reject payout requests with optional rejection notes
FR-HM-07	Commission history: Last 12 months of commission totals per agent, accessible via agent detail view

6C. Agent Portal — Commission Dashboard

Ref	Requirement
FR-AG-01	Dashboard header: Current month commission total, MTD fuel liters, KPI evaluation period (Dec 1–31) displayed as a label
FR-AG-02	KPI progress bar: Current total volume vs KPI target within Dec 1–31 evaluation window. Progress counted from Dec 1, not agent join date.
FR-AG-03	SP Account breakdown table: SP Account name, Liters (period), Tier applied, Base rate, Commission amount
FR-AG-04	Monthly history view: Last 12 months of commission totals with status (Pending / Approved / Paid)
FR-AG-05	Clicking a month or SP row shows transaction-level detail (date, volume, commission)
FR-AG-06	"Request Payout" CTA — enabled only when there is an approved, unpaid commission balance
FR-AG-07	Payout request form: Pre-filled amount (total approved balance), bank details from agent profile, optional notes
FR-AG-08	Payout history: Date submitted, Amount, Status, Host rejection notes if applicable
FR-AG-09	Export: Commission summary downloadable as PDF or Excel for current or historical periods

6E. Commission Validity Engine

Ref	Requirement
FR-CV-01	System calculates commission end date using: 31 Dec of (Effective First Usage Year + N – 1), where N = configured validity years (default 3)
FR-CV-02	Any org with first usage before 1 Jan 2026 has its effective date snapped to 1 Jan 2026 automatically
FR-CV-03	Any org with first usage on or after 1 Jan 2026 uses the actual first usage date as effective date
FR-CV-04	Host can configure N validity years per org (default 3). Change applies from the next commission period.
FR-CV-05	When an org's commission validity expires, the system returns RM 0 for that org and stops further calculation (Step 1 of rule execution order)

FR-CV-06	Commission end date is displayed on the Agent Commission tab per SP Account row (read-only)
FR-CV-07	Host receives an in-portal notification when an org's commission validity is within 60 days of expiry

6F. New Org Exception Rule

Ref	Requirement
FR-NOE-01	System identifies a New Org as any org whose first usage date falls within the current commission year (Jan 1 – Dec 31)
FR-NOE-02	Default New Org Exception mode is Auto 100% — system automatically applies 100% commission multiplier regardless of KPI achievement for the first eligible year
FR-NOE-03	Host can set exception mode per org at time of assignment: Auto 100% / Custom % / No Exception (Disabled)
FR-NOE-04	Custom % mode: Host enters a specific multiplier (e.g. 50%) for that org's first eligible year
FR-NOE-05	No Exception mode: New org follows standard KPI tier rules from their first month — no protection period
FR-NOE-06	New Org Exception applies to the first eligible commission year only. From Year 2, standard KPI tiers apply automatically.
FR-NOE-07	New Org Exception status is visible on the Agent Commission tab per SP Account row (e.g. "100% (new org)", "50% (custom)", "—")

6G. Agent Termination Logic

Ref	Requirement
FR-TM-01	Host can set a termination date for an agent's commission on a specific org, at the org-agent assignment level
FR-TM-02	Termination date can be backdated or forward-dated by Host
FR-TM-03	Commission for the termination month is pro-rated to the termination date — agent is not paid for the full month
FR-TM-04	Rebate report runs on the 4th of every month. This is the commission cutoff date — commission is attributed based on state as of the 4th.
FR-TM-05	After the termination date passes the 4th-of-month cutoff, no further commission is generated for that agent on that org
FR-TM-06	Hold State: If the incoming new agent has not been confirmed before the 4th cutoff, the outgoing agent is held at their current KPI tier until the new agent assignment is confirmed

FR-TM-07	Hold State is released automatically once the new agent assignment is confirmed by Host
----------	---

6H. Agent Transfer Flow

Ref	Requirement
FR-TR-01	Host can transfer an org from one agent to another via the SP Account assignment UI
FR-TR-02	Commission duration follows the org's original validity timeline — the org's end date is NOT reset from the transfer date
FR-TR-03	Old agent's commission terminates on the transfer date set by Host (can be backdated or forward-dated)
FR-TR-04	New agent's commission starts the following month after the transfer is completed
FR-TR-05	The org's commission year marker (Year 1 / Year 2+) is preserved — it is not restarted on transfer
FR-TR-06	Hold State applies during transfer: outgoing agent is held at their current KPI tier until the 4th-of-month cutoff passes, after which new agent takes over attribution
FR-TR-07	Transfer history is logged per org — system maintains a record of all agent assignments with start/end dates for audit

6J. Rebate Page: Agent/Referrer Cleanup

Ref	Requirement
FR-RP-01	Remove "Agent" and "Referrer" from the Receiver dropdown on the Rebate page. Rebate page is org-only going forward.
FR-RP-02	Agent commission amounts previously surfaced via the rebate page agent filter now surface exclusively in Tab 2 (MyFuel Commission).
FR-RP-03	Historical records where receiver = Agent or Referrer must NOT be deleted — pending OQ12 for display decision.
FR-RP-04	For agent rows, rename column label "Rebate Amount" → "Commission Amount". Terminology: Rebate = org cashback; Commission = agent payment.

7. Menu & Navigation Impact

Host Portal (Web)

Menu Location	Page / Section	Notes
---------------	----------------	-------

Main Nav → Agent	Tab 1: Agent List	Agent list with KPI config + Commission Status column
	Tab 2: MyFuel Commission	SP Account level commission records, filters, Excel export. Replaces Commission History.
Main Nav → Referrer	Separate sidebar item (confirmed)	Separate from Agent nav. Referrer scope: see Referrer Portal PRD
Dashboard → Commission	Add all agent summary dashboard metrics	Default landing page
SP Account → Rebate Setting	Rebate Setting	Remove Agent/Referrer from receiver dropdown. Rename "Rebate Amount" → "Commission Amount" for agent rows (see 6J)
Commission → Export	Full report download	Rebate page right now

Agent Portal (Web)

Menu Location	Page / Section	Notes
Main Nav	Commission	New top-level nav item
Commission → Dashboard	KPI progress + SP breakdown	Default landing
Commission → History	Monthly history (12 months)	Sub-page

Org Portal (Flutter App)

Menu Location	Page / Section	Notes
Account / Profile → My Account	Agent Info section	No new menu — embedded widget in existing settings
Fields shown	Agent name, contact	Read-only, no edit

8. Out of Scope (V1)

Item	Notes
Referrer commission	Separate PRD — same engine will be replicated once agent commission is validated
Reseller commission	Future role — noted as upcoming
Agent onboarding / registration	Prerequisite; handled separately
Automatic bank disbursement	V1 is manual approval only
Tax / SST handling	Deferred
Commission on subscription fees	Confirmed out of scope — fuel only
Multi-agent commission split per org	Deferred to V2 (Fuel 2.0 multi-agent)
Agent performance gamification	Future consideration

9. Risks & Dependencies

#	Risk / Dependency	Impact	Mitigation	Status
R1	Two-layer model (tier + KPI) alignment	Commission engine model	Confirmed May 14 — two-layer model agreed: volume tier rate × KPI multiplier	✅ Resolved
R2	Bug #6 — commission grouping bug unresolved	May corrupt commission calculations	Diagnose root cause before build. Treat as blocker.	⌚ Open
R3	Agent DB table location unknown	Engineering cannot test without knowing agent records in DB	Lian Shen to identify the correct agent table	⌚ Open
R4	No bank detail collection for agents	Payout flow blocked	Add bank detail fields to agent profile as prerequisite task	⌚ Open
R5	Commission config currently manual/offline	Data inconsistency during migration	Audit and digitize all existing agent commission agreements before go-live	⌚ Open
R7	Petron 2–3hr sync delay	Commission totals lag real-time	Calculate on settled transactions only; show last sync timestamp in UI	⌚ Open

R8	Testing complexity with 200+ orgs per agent	QA may miss commission calculation errors	Build commission audit log; test with controlled dataset	 Open
----	---	---	--	--

10. Open Questions

#	Question	Owner	Priority	Status
OQ1	Should the existing agent tier structure be replaced by KPI, or kept as a separate layer?	Marcus / Finance	 High	 Resolved — Two-layer model confirmed May 14
OQ2	What are the exact KPI achievement thresholds and multipliers?	Finance	 High	 Resolved — Tier 1: $\geq 100\% \rightarrow 100\%$; Tier 2: $75\text{--}99\% \rightarrow 50\%$; Tier 3: $<75\% \rightarrow 0\%$
OQ3	What is the exact default base rate?	Finance	 High	 Resolved — RM 0.005/L confirmed
OQ4	What is the payout cycle — monthly auto-trigger, on-request, or both?	Finance	 High	 Open, but out of scope for now
OQ7	KPI for a newly joined agent mid-period — is target prorated or the same as other agents?	Finance	 Medium	 Resolved — New Org Exception (Auto 100%) covers first-year protection. KPI target not prorated.

13. Appendix — Related Tickets & References

Reference	Notes
Bug #6 — Agent & Referral commission grouping bug	Must be resolved before development begins
[Api-Agent/Referral] Commission projection	Existing GitHub ticket — No Status; to be linked to this PRD
Agent Portal 2.0 — Commission module	Part of the broader Agent Portal 2.0 revamp
Fuel 2.0 — Multi-agent per org	Dependency for V2 multi-agent commission logic
Meeting: Org-Agent Commission Tier (May 14, 9 min)	Clarified two-layer model, org grouping isolation, base rate default

Meeting: MyLorry Product Session (May 14, 23 min)	Confirmed KPI dashboard requirements, two-layer model, quick-win ticket scoped
BRD: Agent Commission Scheme (May 14, 2026)	Source of record for formula, KPI tiers, validity engine, termination logic, transfer flow, hold state, 4th-of-month cutoff

Agent (3-tab page) · Existing "Commission History" nav item to be hidden · SP Account → Rebate Setting modified

Agent Portal (Web)

Prefix: [Web-Agent] · Audience: Internal agents (~7–10) · Auth: agent-scoped, no cross-agent visibility

Commission dashboard

KPI bar, SP breakdown
Header totals

Commission history

12 months, drill-down
to transaction level

Payout request

Submit, status tracking
rejection notes visible

Export

PDF + Excel
current + history

Portal is outside Host/Org taxonomy — agent sees own data only · Bank detail prerequisite in agent profile (R4)

Org Portal (Flutter app)

Prefix: [Mobile-Org] · Read-only, no commission config — agent transparency only

Agent info widget

Embedded in Account → My Account · Fields: agent name, contact, rebate rate (read-only) — embedded in existing settings page
